Income ceiling for extended family

If you and your spouse are buying a flat with your children (who are earning an income) as co-applicants or occupiers~~,~~, the household is buying as an extended family.

The average gross monthly household income for extended families is calculated as follows:

Family Profile	Income of Group A (cannot exceed $16,000 per month)	Income of Group B (cannot exceed $16,000 per month)	Income Ceiling of Extended Family
Parents^ with single working children	Parents with 1 single working child	Other single children	**Total incomes of Groups A and B must not exceed $24,000**
Parents^ with married child*	Parents with single working children (if any)	Married child's family*	

^ Includes widow/widower or divorcee.
* Includes applicants buying a flat with their fiancé/fiancée.

Example

A married couple with 3 working children wishes to get an HDB housing loan to buy an HDB flat. Their average gross monthly incomes are as follows:

Husband : $ 5,000
Wife : $ 5,000
Child 1 : $ 5,000
Child 2 : $ 4,000
Child 3 : $ 5,000

Their average gross monthly income as an extended family works out to be:

Group	Income of Group (Cannot exceed $16,000)	Total Income (Cannot exceed $24,000)
Parents and 1 child: Husband + Wife + Child 2	$14,000	**$24,000** The extended family meets the income ceiling.
Remaining children: Child 1 + Child 3	$10,000
